

VPC Challenges

We already have two vpc's available and both the CIDR range are not overlapping

☐	Name	VPC ID	State	Encryption c...	Encryption coi
☒	my-vpc-vpc	vpc-0ba04db3a6aec5489	Available	–	–
☐	–	vpc-0c750680361361647	Available	–	–

My-vpc-vpc has 10.0.0/16

Default vpc has 172.31.0.0/16

Now we need to create Transit gateway

✔ You successfully created tgw-0e05d674bb26682b6 / my-transit-gateway.

ℹ You can visualize and monitor your Transit Gateway(s) from the [AWS Network Manager](#). Register your Transit Gateway by creating a [global network](#) to get started.

Transit gateways (1) [Info](#)

[Actions](#)[Create transit gateway](#)

< 1 >

☐	Name	Transit gateway ID	Owner ID	State
☐	my-transit-gateway	tgw-0e05d674bb26682b6	469132170253	Pending

[VPC](#) > [Transit gateway attachments](#) > Create transit gateway attachment

Select and configure your VPC attachment.

☒ DNS support [Info](#)☒ Security Group Referencing support [Info](#)☐ IPv6 support [Info](#)☐ Appliance Mode support [Info](#)

VPC ID

Select the VPC to attach to the transit gateway.

vpc-0ba04db3a6aec5489 (my-vpc-vpc)
10.0.0.0/16

vpc-0c750680361361647
172.31.0.0/16

In the transit gateway attachments use my-vpc-vpc

Then create

Add another vpc attachment for default vpc

VPC attachment

Select and configure your VPC attachment.

☒ DNS support [Info](#)

☒ Security Group Referencing support [Info](#)

vpc-0ba04db3a6aec5489 (my-vpc-vpc)
10.0.0.0/16

vpc-0c750680361361647
172.31.0.0/16 ☒

vpc-0c750680361361647

Transit gateway attachments (2) [Info](#)

Actions ▾

Create transit gateway attachment

< 1 > ⚙

☐	Name ▾	Transit gateway attachment ID ▾	Transit gateway ID ▾	State ▾	Resou...
☐	default-vpc-attachm...	tgw-attach-0540c3eaaff477619	tgw-0e05d674bb26682b6	✔ Available	VPC
☐	my-vpc-attachment	tgw-attach-0b8b1d767bfa27f58	tgw-0e05d674bb26682b6	✔ Available	VPC

both the vpc's are available and attached to transit gateway

Routes (2)

Both ▾

[Edit routes](#)

< 1 > ⚙

Destination ▾	Target ▾	Status ▾	Propagated ▾	Route Origin ▾
10.0.0.0/16	local	✔ Active	No	Create Route Table
172.31.0.0/16	tgw-0e05d674bb2668...	✔ Active	No	Create Route

We added route to the private vpc {my-vpc-vpc}

Now we need to do reverse routing in th default routing

☒	-	rtb-0eeb9ca56b97018d8	-	-	Yes
☐	my-vpc-rtb-private2-us-east-1b	rtb-053bd5471f86c9876	-	-	No

rtb-0eeb9ca56b97018d8

< 1 > ⚙

Destination ▾	Target ▾	Status ▾	Propagated ▾	Route Origin ▾
0.0.0.0/0	igw-0d8b0a0e14383...	✔ Active	No	Create Route
172.31.0.0/16	local	✔ Active	No	Create Route Table

We can see for our default vpc internet gateway is active and the local is also active now we need to add transit gateway

172.31.0.0/16	local	Active	No	CreateRouteTable	
	Q local				
Q 0.0.0.0/0	Internet Gateway	Active	No	CreateRoute	Remove
	Q igw-0d8b0a0e14383cddb				
Q 10.0.0.0/16	Transit Gateway	-	No	CreateRoute	Remove
	Q tgw-0e05d674bb26682b6				

Add route

Cancel Preview Save changes

We added new route for 10.0.0.0/16 and transit gateway attached

Now VPC endpoint

VPC > Endpoints > Create endpoint

Additional settings

Route tables (2/4) Info

Search

	Name	Route Table ID	Main	Associated Id
☐	my-vpc-rtb-public	rtb-0b7cb732e07bc8456 (my-vpc-rtb-p...	No	2 subnets
☒	my-vpc-rtb-private1-us-east-1a	rtb-0e70449f34e0820f1 (my-vpc-rtb-p...	No	2 subnets
☒	my-vpc-rtb-private2-us-east-1b	rtb-053bd5471f86c9876 (my-vpc-rtb-p...	No	-
☐	-	rtb-05887bcf731c34932	Yes	-

So here the private subnets can access s3 without needing a NAT Gateway for s3 traffic
